¹A transient ischemic attack (TIA) is an event with stroke symptoms that lasts less than 24 hours before disappearing (sometimes called a mini-stroke). While TIAs generally do not cause permanent brain damage, they are a serious warning sign of stroke.

²An Implantable Cardioverter Defibrillator (ICD) is an electronic device which monitors your heart continuously. The ICD is programmed to detect abnormally fast or slow heart rhythms.

³If in doubt, please consult your family doctor.

Certain additional information, restrictions or conditions to be fulfilled by the driver relating to the holding of a learner permit may be noted on a permit in coded format. Further information regarding the codes is set out in the explanatory letter issued with your permit and at www.ndls.ie
